

OLOWO DARE

Frontend & Web3 Developer · React.js · Next.js · JavaScript · Git & GitHub

Kaduna, Nigeria · +234 814 229 3610 · olowodarey@gmail.com · github.com/Olowodarey

PROFILE

Results-driven Frontend & Web3 developer with hands-on experience building responsive, production-ready web applications — including a live blockchain payment protocol and a football prediction platform on Celo. Proficient in React.js, Next.js, JavaScript (ES6+), HTML5 and CSS3, with solid experience in REST API integration, Git & GitHub workflows and mobile-first design. Combines engineering precision with creative problem solving, and a track record of shipping real projects used by real users.

SKILLS

Languages & Markup: HTML5, CSS3, JavaScript (ES6+), TypeScript

Frameworks & Libraries: React.js, Next.js, Tailwind CSS, Responsive / Mobile-First Design

Blockchain & Web3: Celo, Base, Solana, Stellar, Smart Contract Integration, Privy, On-chain Data

Tools & Workflow: Git, GitHub, REST APIs, Frontend–Backend Integration, Vercel

Data & Productivity: Microsoft Excel, Microsoft Power Apps, MATLAB, Data Handling & Analysis

Soft Skills: Technical Documentation, Problem-Solving, Cross-functional Teamwork, Communication

LIVE PROJECTS

Gigipay — Blockchain Payment Protocol

2025 — Present

gigipay-app.vercel.app · React.js, Next.js, Celo Blockchain, Privy, REST APIs, Git

- Built a fully live, Celo-powered on-chain payment platform that enables users to send crypto to multiple wallet addresses in a single batch transaction, cutting gas costs and saving time.
- Implemented a claim-code voucher system allowing senders to issue payments without needing the recipient's wallet address — recipients redeem via Gmail login and an auto-created embedded wallet, lowering Web3 onboarding friction to near zero.
- Integrated Privy for seamless Gmail-to-wallet onboarding, enabling non-crypto users to receive on-chain funds without MetaMask or seed phrases.
- Delivered features including Batch Payments, Voucher Creation & Claiming, Airtime top-up (MTN, Glo, Airtel, 9mobile), and Token Swap — all production-deployed on Celo and Base networks.

TrueCall — Blockchain Football Prediction Platform

2025 — Present

truecall.vercel.app · React.js, Next.js, Celo Blockchain, AI Oracle, Twitter OAuth, Git

- Developed a live, blockchain-powered football prediction platform on Celo where every user prediction is written on-chain — creating a transparent, tamper-proof prediction record.
- Implemented Twitter OAuth verification with on-chain anti-Sybil protection to prevent fake accounts and bots, ensuring all participants are unique and authentic.
- Integrated an AI oracle that automatically fetches and submits match results on-chain, enabling fully automated and trustless resolution of prediction events.
- Built creator event flows allowing verified users to host custom 5-match prediction events, with gas-free participation for predictors powered by Celo's mobile-first architecture.

PROFESSIONAL EXPERIENCE

Freelance / Open Source — Remote

2024 — Present

Open-Source Contributor & Frontend Developer

- Shipped responsive UI components across 3+ open-source and freelance web projects, improving cross-device usability for real-world user bases.
- Collaborated with distributed developer teams using Git & GitHub workflows — managing branches, pull requests, and code reviews to maintain code quality.
- Integrated REST API endpoints into frontend interfaces, enabling dynamic data rendering and improving application interactivity.
- Applied mobile-first design principles to rebuild legacy UI sections, reducing layout breakpoints and enhancing usability on small-screen devices.
- Diagnosed and resolved 10+ bugs across active repositories using structured debugging techniques, cutting reported UI defects by an estimated 30%.

Best Solution International — Abuja, Nigeria

Jun 2022 — Jun 2023

Service Teacher (NYSC)

- Delivered technical science curriculum to 30+ students, developing the ability to communicate complex concepts clearly — directly applicable to team stand-ups and code reviews.
- Designed structured lesson plans and performance records, reinforcing organisational skills applied to project planning and task management in development workflows.

Tower Galvanised Products — Kaduna, Nigeria

Mar 2019 — Dec 2019

Production Assistant

- Maintained detailed daily production records with zero data-entry errors across an 8-month tenure, cultivating a precision-driven approach now applied to code and technical reporting.
- Identified and escalated 15+ recurring production anomalies using root-cause analysis — a problem-solving methodology directly transferable to debugging frontend issues.

EDUCATION

Higher National Diploma (HND) — Mechanical Engineering

2018 — 2021

Federal Polytechnic Bida

National Diploma (ND) — Mechanical Engineering

2015 — 2017

Federal Polytechnic Bida
